(54) Title: NOVEL WATERCRAFT

(57) Abstract

A novel watercraft, which may include a hull with a keel, having a propulsion device extending below the water line comprising a pair of flappers (46, 48) each adapted to oscillate through an arcuate path in a generally transverse direction with respect to the central longitudinal dimension of the watercraft, and a device (18, 20) operatively associated with the propulsion device for applying input force to the propulsion device.
