Abstract

An object of the present invention is to provide a tablet containing acotiamide or a salt thereof at a high concentration and having not only a good dissolution property but also good storage stability. The present invention relates to a tablet containing a granulated material which contains (A) acotiamide or a salt thereof, (B) pregelatinized starch, and (C) a disintegrant selected from the group consisting of low substituted hydroxypropylcellulose and sodium starch glycolate, wherein the component (A) is contained in an amount of 65% by mass or more and 91% by mass or less in an uncoated tablet.
