

Abstract

The present invention relates to a pyridine-containing polycyclic derivative, and a preparation method therefor and the use thereof. In particular, the present invention relates to a compound as represented by general formula (I), a preparation method therefor, a pharmaceutical composition containing the compound, and the use thereof as a biological regulator in the preparation of a medicament for the treatment of autoimmune diseases, chronic inflammatory diseases, acute inflammatory diseases, autoinflammatory diseases, atherosclerosis, diabetes, fibrotic diseases, metabolic diseases, cancers, tumors, leukemia and lymphoma, wherein the definition of each substituent in general formula (I) is the same as that in the description.
