(54) Title: SALES SYSTEM AND METHOD FOR PRESCRIPTION PRODUCTS

(57) Abstract: The present invention relates to a system for ordering prescribed productions. The system includes an uthorized reseller system with authorized reseller registration component through which prescriptions are entered. The system also comprises a consumer system with a consumer registration component and a prescribed product order placement system. Furthermore, the system includes a prescription management system with a prescription verification function, which processes the entered prescription information to generate a calculated approved prescription. The calculated approved prescription includes a maximum purchase amount and an actual wear schedule. The authorized reseller system, consumer system and the prescription management system are communicatively linked so that the user may order prescribed products directly from the manufacturer.
