CLAIMS

1. A package, comprising:

a base material including a paper layer;

a film that covers a content set on the base material; and

an easy-peel structure that bonds the base material and the film to seal the content, wherein

the easy-peel structure corresponds to a portion where an innermost layer of the base material forms a seal with an innermost layer of the film, and

a combination of the innermost layer of the base material and the innermost layer of the film includes any one of:

a combination of (a) polyethylene and (b) an ionomer resin; and

a combination of (a) an easy-peel film including a mixture of polyethylene and polypropylene and (b) polyethylene.

2. The package according to claim 1, wherein the easy-peel structure has a waterproof property.

3. The package according to claim 1 or 2, wherein

the base material includes a barrier layer formed on the paper layer, and

the barrier layer is formed from a material that excels in at least one of a gas-barrier property and a moisture-barrier property.

4. The package according to claim 3, wherein

the barrier layer is formed from a material that excels in at least the moisture-barrier

property, and

the barrier layer is formed at a position closer to the content than the paper layer.

5. The package according to any one of claims 1 to 4, wherein the paper layer has a grammage included in a range of 100 g/m^2 or greater to less than 1000 g/m^2.

6. The package according to any one of claims 1 to 5, further comprising:

a waterproof layer formed on a side of the paper layer opposite to the content.

7. The package according to any one of claims 1 to 6, wherein the easy-peel structure is arranged at least in a range corresponding to a predetermined range that includes an edge of the base material and a predetermined range that includes an edge of the film.

8. The package according to any one of claims 1 to 7, wherein the easy-peel structure includes an easy-peel film arranged on the base material or the film.

9. The package according to any one of claims 1 to 8, wherein the easy-peel structure has a sealing strength in a range of 0.5 N/15 mm or greater to 5 N/15 mm or less.

10. The package according to any one of claims 1 to 9, further comprising:

a content sealed in the base material and the film.
