(54) Title: A METHOD OF HYDROTREATMENT AND A HYDROTREATMENT SYSTEM

(57) Abstract: A method of hydrotreatment is provided. The method comprises the steps of providing a material that is suitable for undergoing hydrotreatment; mixing the material with a hydrogenation agent to form a feed stream; and heating the feed stream to break chemical bonds of the material in the presence of a catalyst. The feed stream is heated to at least a temperature at which the catalyst can provide activated hydrogen to react with the broken bonds within the material so as to minimise coke formed from the material. A system for conducting the method is also provided.
