(54) Title: ARRANGEMENT FOR STORAGE, WAREHOUSE RACK AND HANDLING MACHINE PARTICULARLY FOR SUCH ARRANGEMENT

(57) Abstract: The invention relates to an arrangement for storage, which includes a warehouse rack containing shelves (14) located on columns, a handling machine movable to the designated shelf of the warehouse rack, and a handling device capable of placing goods or a storing device (30) for storing goods on the shelves (14) or taking them down from the shelves (14) and moving them to a designated location. A passive lifting device (240) is associated with the warehouse rack (10) and the handling machine (100) is formed as a locomotive handling machine capable of moving on a designated path, and the handling device (130) is located on the handling machine (100), and on the handling machine (100), there is an active lifting device (200), which can be coupled with the passive lifting device (240) and forward the handling machine (100) to the designated shelf in cooperation with the passive lifting device (240).
