

Abstract

The invention relates to a landing door (8) of an elevator system (1) comprising a door
leaf (9) is equipped with an integrated operating and/or display panel (10) which is
5 designed in such a way that, in the event of a fire, a printed circuit board (14) of the
operating and/or display panel (10) can be removed from the door leaf (9). In order to
remove the printed circuit board (14), an ejection device (10) comprising intumescent
material (18, 19) is provided in the door leaf (9).
