CLAIMS

1. A peritoneal dialysate set comprising:

a first peritoneal dialysate that contains 1.5 to 1.8 w/v% of glucose and 120 to 130 mEq/L of sodium; and

a second peritoneal dialysate that contains 1.35 to 2.5 w/v% of glucose and 132 to 135 mEq/L of sodium,

wherein the first peritoneal dialysate and the second peritoneal dialysate are to be independently used three to five times in total a day in peritoneal dialysis that involves injection of an amount of 1.5 to 2.0 L in an abdominal cavity of a subject, storage and drainage, in which the first peritoneal dialysate is to be used once or twice a day.

2. A composition for use in peritoneal dialysis,

wherein the composition comprises 1.5 to 1.8 w/v% of glucose and 120 to 130 mEq/L of sodium,

wherein the composition is to be used in combination with another composition containing 1.35 to 2.5 w/v% of glucose and 132 to 135 mEq/L of sodium for peritoneal dialysis,

wherein the composition and the another composition are to be independently injected in an amount of 1.5 to 2.0 L in an abdominal cavity of a subject, stored and drained three to five times in total a day, in which the composition is to be used once or twice a day.
