(54) **Title**: REMOTELY PRECONFIGURING A COMPUTING DEVICE

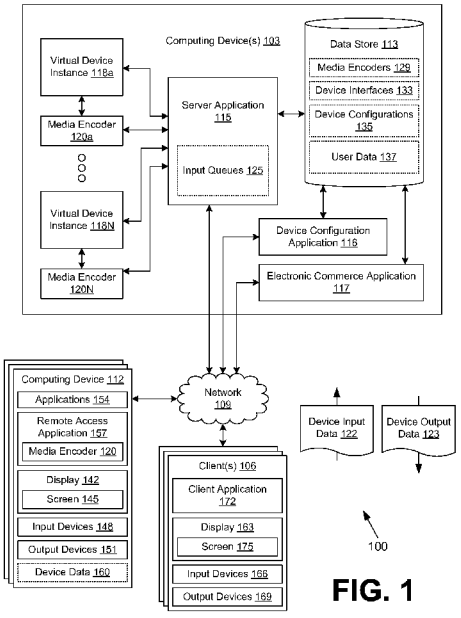

FIG. 1

(57) **Abstract**: Disclosed are various embodiments for preconfiguring a computing device remotely. A virtualized version of a computing device may be executed remotely and preconfigured by a user. The configuration of the virtualized version of the computing device may then be replicated to a physical version of the computing device. Alternatively, the physical version of the computing device may be executed remotely and preconfigured directly by the user.
