

ABSTRACT

METHOD FOR PRODUCING COAL ASH, COAL ASH, AND CEMENT COMPOSITION

Provided are coal ash and a method of preparing the same,
5 in which the coal ash containing a large amount of unburned carbon
can be used without performing a process of classification and
in which uniformity during mixing for improvement of cohesive
soil can be improved.

The method of preparing coal ash comprises: crushing coal
10 ash having an ignition loss of 3.5 mass% or higher such that
a ratio (L_g/L_p) of a lightness (L_g value) of the coal ash after
crushing to a lightness (L_p value) of the coal ash before crushing
is 0.9 or lower.
