ABSTRACT

A CONTROL APPARATUS AND METHOD FOR CONTROLLING A PARAMETER OF AUDIO REPRODUCTION OF A SOUND REPRODUCTION APPARATUS

In a first aspect, there is provided a control apparatus and method for controlling at least one parameter of audio reproduction of a sound reproduction apparatus. The control apparatus and method enables control of of at least one parameter of audio reproduction depending on contact with a touch sensitive panel. The parameters which may be controlled include, for example, volume, bass, treble, equalizer settings and the like.
