

DRUM WASHING MACHINE

ABSTRACT

5 A drum washing machine according to the present disclosure includes
a main body, a receiving cylinder that is provided in the main body, a drum
that is rotatably supported inside the receiving cylinder and contains laundry,
a baffle that is provided on an inner peripheral surface of the drum and
agitates the laundry, and a controller. The baffle is formed to have a
10 trapezoidal cross section, and includes a first side surface portion where a
plurality of water passage holes communicating with an inner space of the
baffle is provided.
