

ENVIRONMENTAL CONTROL SYSTEM, ENVIRONMENTAL CONTROL METHOD, AND PROGRAM

[ABSTRACT]

5 An environmental control system (100) includes a first
acquirer (11) and a controller (13). The first acquirer (11) acquires
first user information that includes at least one of vital information or
preference information on a user. The controller (13) controls
environments of a plurality of spaces that are in a one-to-one
10 correspondence with a plurality of groups (G1), by controlling one or
more environment providing devices (2) allocated to each of the
groups (G1) in accordance with the first user information acquired by
the first acquirer (11). The one or more environment providing
devices (2) include at least a device other than a blower.
