(54) Title: RECEIVER AND ASSOCIATED PRINTING APPARATUS

(57) Abstract: An information retrieval system for retrieving information relating to a broadcast includes a radio frequency receiver and a detector for detecting identifying data relating to a particular broadcast received by the receiver, the identifying data being transmitted in association with the broadcast. A processor is in communication with the detector and processes the identifying data to provide formatted data suitable for printing. A printing unit is associated with the receiver for printing the formatted data to provide information relating to the broadcast.
