(54) Title: COMPOUNDS FOR MEDICINAL APPLICATIONS

(57) Abstract: The present invention provides compounds for use in treating and/or preventing influenza. The compound comprises a first and second domain in which the first domain comprises at least one anchoring group which binds to the surface of influenza viruses and the second domain comprises at least one anionic group. The first and second domains are covalently linked. Also provided are pharmaceutically acceptable salts, solvates, prodrugs or stereoisomer of the compounds.
