(54) Title: MEASUREMENTS COLLECTION FOR MODEL TRAINING

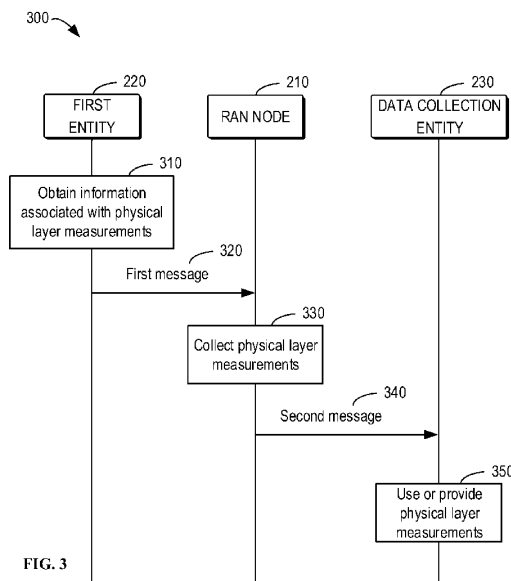

FIG. 3

(57) Abstract: Example embodiments of the present disclosure relate to a RAN node, entities, methods, apparatuses, and computer readable medium for measurements collection for model training. In the solution, the RAN node may report the physical layer measurements to the data collection entity, and thus a further usage (such as model training at a training entity) may be enabled. In some examples, the physical layer measurements may be reported to more than one data collection entity, as such, an additional request for the physical layer measurements may not be needed, and thus the overhead may be reduced.
