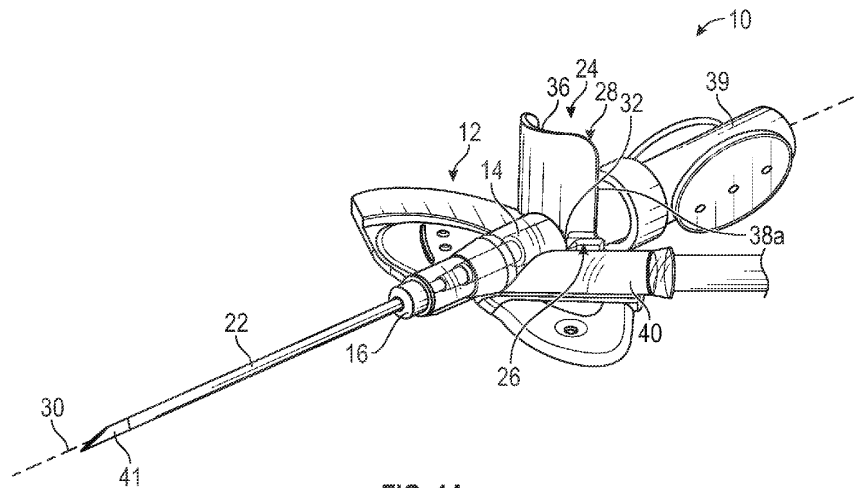

FIG. 1A

(57) Abstract: A catheter assembly 12 includes a catheter adapter 14, which includes a distal end, a proximal end, and a lumen extending between the distal end and the proximal end. The catheter assembly includes a push tab 24. The push tab is pivotally coupled to the catheter adapter. The push tab is pivotally moveable between a raised position and a depressed position. The catheter assembly may include another push tab, which may be resilient and may include a first end, a second end, and an arched portion between the first end and the second end.
