ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: **DEAD ON DEMAND DISK TECHNOLOGY**

(57) **Abstract:** The present invention relates to a system and method for permanently and generally instantaneously destroying at least the data contained on magnetic data storage media (14) upon the occurrence of certain events. Unauthorized access to data stored on magnetic media (14) is prevented by destruction of the media (14) with a reactant chemical (10). This approach may be initiated as a response to tampering or intentionally by using any one of several triggering interfaces described herein. Destruction of the media (14) is quick and permanent, rendering the data unrecoverable even to aggressive recovery procedures.
