

INFORMATION PROCESSING APPARATUS, INFORMATION  
PROCESSING METHOD, AND STORAGE MEDIUM

[ABSTRACT]

An information processing apparatus in the present invention includes: an acquisition unit that acquires first history information indicating that a procedure related to boarding of a passenger in an airport was performed with biometric authentication and second history information indicating that the procedure was performed with reading of a medium; and an output unit that outputs usage status of the biometric authentication in the procedure based on the first history information and the second history information.
