(54) Title: MOUNTING ARRANGEMENT FOR A SUCTION MUFFLER IN A LINEAR MOTOR COMPRESSOR

(57) Abstract: The mounting arrangement is applied to a compressor which comprises: a piston (10) having a cylindrical tubular body (11); and an actuating means (30) connected to the piston (10) to drive the latter in a reciprocating movement. The suction muffler (60) comprises two tubular inserts (61, 62), longitudinally disposed in the interior of the piston (10) and having spaced apart open adjacent ends (61a, 62a), and closed opposite ends (61b, 62b) respectively affixed to the top wall of the piston (12) and to the actuating means (30), and defining, in the interior of the piston (10), a muffling chamber (C) and an annular passage (15) medianly opened to the muffling chamber (C) and communicating an open rear end (11a) of the piston (10) with a suction valve (50) provided in a top wall (12) of said piston (10).
