

ABSTRACT

The ship hull 12 including an area for installing the accommodation area 16 is constructed. The various types of facility devices 22, 24, 26 and 30, which are located inside the ship hull 12 and are related to cargo handling operations, are controlled by the cargo control unit 28 located inside the ship hull 12. The remote controller 36 for remotely controlling the cargo control unit 28 is located in the cargo control room 34 inside the accommodation area 16. The remote-handling controller 36 inside the accommodation area 16 and the cargo control unit 28 inside the ship hull 12 are connected through the junction box 32 provided on the ship hull 12.
