(54) Title: STATIONS, ACCESS POINTS, COMMUNICATION SYSTEMS AND METHODS OF CONTROLLING THE SAME

(57) Abstract: In various embodiments, a method of controlling a station may be provided. The method may include receiving a first signal from an access point, the first signal including information indicating a time period. The method may further include deactivating the station after receiving the first signal and before expiry of the time period. The method may also include activating the station upon expiry of the time period.
