(54) Title: PHARMACEUTICAL COMPOSITION FOR THE TREATMENT OF NAIL DISEASES

(57) Abstract: A method for topically and systemically delivering a pharmaceutical composition to a human nail is disclosed, said method comprising the application of a pharmaceutical composition to the nail, covering the nail and the pharmaceutical composition with a protective layer, and a dissolvent to remove the protective layer and the pharmaceutical composition after a certain time of action and before reapplication. Preferably the method is combined with a laser pretreatment of the nail to drill arrays of partial orifices to enhance the permeability of drugs through the nail plate.
