(54) Title: ELECTRONIC INVOICING AND PAYMENT SYSTEM

(57) Abstract

A system for automated electronic invoicing and payment system for providing remote customer review of automated billing from an invoicer. The system includes invoice presentment electronics having a control system and first communication electronics (101). The system also includes at least one remote authorization terminal having a customer interface, the terminal having second communication electronics (110) adapted to operatively communicate with the first communication electronics (101). The control system of the invoice presentment electronics is adapted to provide billing data, regarding a customer invoice preauthorized for automated billing, to the first communication electronics (101) for transmission to the second communication electronics (110). The customer interface of the remote authorization terminal is adapted to present the billing data to a customer and to receive a response relating to the billing data from the customer, the response indicating one of acceptance of the billing data or modification thereto.
