(54) Title: METHOD FOR SEPARATING GASES FROM SOLIDS IN A GAS-SOLIDS REACTION SYSTEM USING A GAS-SOLIDS FLOW

(57) Abstract: A gas-solids reaction system is provided for improving product recovery in a multiple reactor reaction system. The solids of the product gas-solids flows from the multiple reactors are separated out in a separation vessel having a baffled transition zone. Additional product vapor is stripped from the solids as the solids pass through the baffled transition zone. The solids are then returned to the multiple reactors.
