

Abstract

The present disclosure relates to the technical field of mobile communications, and provides a resource calling method and apparatus. According to the method, a resource owner can receive a resource authorization request and/or an application programming interface (API) authorization request sent by an API caller, wherein the resource authorization request is used for requesting, setting or modifying a resource of the resource owner; and send an authorization code request to a first entity, wherein the authorization code request is used for requesting an authorization code, and the resource owner can send the authorization code received from the first entity to the API caller. According to the solution of the present disclosure, a UE can authorize the API caller in an API calling scenario to request a resource of the UE, thereby avoiding data tampering by the resource owner during the authorization process.
