ABSTRACT

ANTI-FGF23 ANTIBODY, AND FRAGMENT OF SAID ANTIBODY

The present invention relates to an antibody or an antibody fragment thereof which binds to FGF23. The antibody comprises a heavy chain variable region (hereinafter, described as VH) comprising the amino acid sequence represented by SEQ ID NO: 1 and a light chain variable region (hereinafter, described as VL) comprising the amino acid sequence represented by SEQ ID NO: 2. At least the amino acid residue at position 100 or the amino acid residue at position 105 of the amino acid sequence represented by SEQ ID NO: 1 in the VH is substituted with another amino acid residue.
