(54) Title: DISTRIBUTION MODULE

FIG. 3

(57) Abstract: The present disclosure is directed towards a distribution module assembly configured for mounting to a marine vessel and comprising a mounting bracket connected to a housing to aid in the stabilization of the marine vessel moving through water. The distribution module assembly further comprises a printed circuit board, a connector plate, and connectors which may connect to a variety of electronic components which also aid in the stabilization of the marine vessel. The printed circuit board is further configured to interface with various electronic components on the marine vessel such as a software control module, an engine control module, a navigation system, a gyroscopic stabilizer, a water engagement device, an engine, and other similar components that could provide the intended functionality and stability during operation of a marine vessel.
