(54) Title: SYSTEMS AND METHODS FOR OPTIMIZATION AND AUTOCONFIGURATION OF EDGE PROCESSING DEVICES

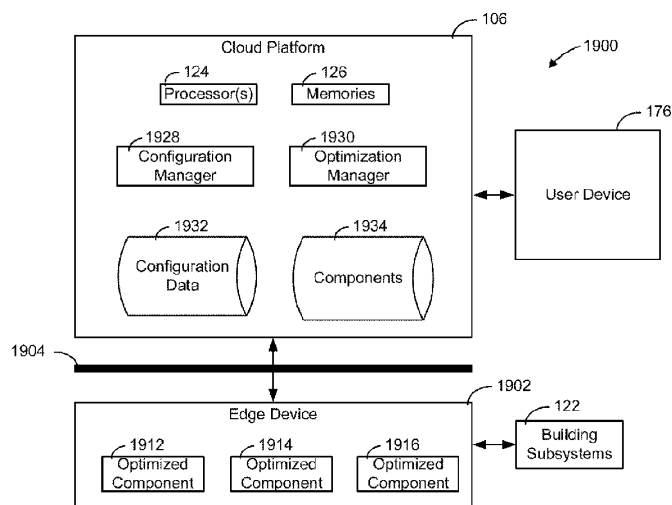

FIG. 19

(57) Abstract: Systems, methods, and non-transitory computer-readable media for optimization and autoconfiguration of edge processing devices are disclosed. A cloud computing system can receive a request to configure a target building device. The cloud computing system can identify, based on the target building device, a connector template for the target building device. The connector template can include one or more parameters for a connector component configured to cause the target building device to communicate with the cloud computing system, cloud computing system can generate the connector component for the target building device based on the one or more parameters, cloud computing system can deploy the connector component to the target building device.
