- (54) Title: SYSTEM AND METHOD FOR COSTUMED CHARACTER INTERACTION

FIG. 4

(57) Abstract: A system for controlling costumed character interaction includes a character costume configured to be worn by a user. The character costume includes an electromagnet integrated into the character costume. The system also includes a stage prop including a magnetic piece integrated into the stage prop. The system further includes a control interface coupled to the electromagnet. The control interface is configured, via a control signal, to activate and to deactivate the electromagnet to control interaction between the character costume and the stage prop via magnetic interaction between the electromagnet and the magnetic piece.
