(54) Title: PAYMENT CODE GENERATION METHOD AND DEVICE

(54) 发明名称: 一种支付码生成方法及装置

- 301 A payment code server receives a payment code generation request sent by a terminal, the payment code generation request comprising a payment related object identifier
- 302 The payment code server obtains payment information of a payment-related object and an affiliated feature identifier of the payment-related object according to the payment-related object identifier
- 303 The payment code server determines affiliated information of the payment-related object according to the affiliated feature identifier of the payment-related object
- 304 The payment code server generates a payment code generation response according to the payment information and affiliated information of the payment-related object, and sends the payment code generation response to the terminal, such that the terminal generates a payment code according to the payment code generation response

(57) Abstract: A payment code generation method and device, for use in solving the problem that additional information prompt cannot be performed due to less information in a payment code. The method comprises: receiving a payment code generation request sent by a terminal, the payment code generation request comprising a payment-related object identifier (301); obtaining payment information of a payment-related object and an affiliated feature identifier of the payment-related object according to the payment-related object identifier (302); determining affiliated information of the payment-related object according to the affiliated feature identifier of the payment-related object (303); and generating a payment code generation response according to the payment information and affiliated information of the payment-related object, and sending the payment code generation response to the terminal, such that the terminal generates a payment code according to the payment code generation response (304).

本国际公布:

— 包括国际检索报告(条约第21条(3))。

(57) 摘要: 一种支付码生成方法及装置, 以解决支付码中信息较少无法进行额外信息提示的问题。该方法为: 接收终端所发送的支付码生成请求, 所述支付码生成请求中包含支付相关对象标识(301); 根据所述支付相关对象标识, 获取所述支付相关对象的支付信息以及所述支付相关对象的附属特征标识(302); 根据所述支付相关对象的附属特征标识, 确定所述支付相关对象的附属信息(303); 根据所述支付相关对象的支付信息以及附属信息生成支付码生成响应, 并将所述支付码生成响应向所述终端发送, 以使所述终端根据所述支付码生成响应生成支付码(304)。
