(54) Title: DISPLAY AND METHOD FOR COOLING BEVERAGE CONTAINERS IN DISPLAY

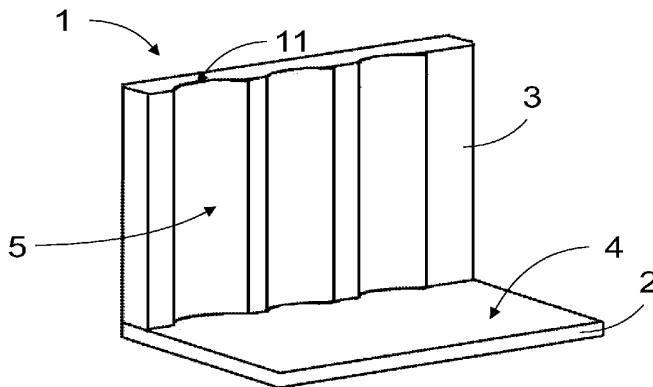

FIG. 1

(57) Abstract: A display (1) for beverage containers (6a, 6b) comprises a first cooling member (2), a second cooling member (3), and a cooling apparatus (9) to cool the first cooling member (2) and the second cooling member (3). The first cooling member (2) comprises a first cooling surface (4) large enough to receive at least three first beverage containers (6a). The second cooling member (3) comprises a second cooling surface (5) configured to extend in a direction perpendicular to the first cooling surface (4) and comprising a plurality of grooves (11) shaped to conform, in each case, a part of a shape of the beverage containers (6a, 6b). Thereby, each first beverage container (6a) can be arranged to simultaneously be in contact with the first cooling surface (4) via its bottom (25) and with the second cooling surface (5) via its side (26).
