

ABSTRACT

Embodiments of the disclosure relate to a method, an apparatus, a device and a storage medium for sharing content. The proposed method includes: receiving a sharing request for a target media content; and controlling, based on the sharing request, posting of a target sharing content associated with the target media content, wherein the target sharing content comprises a media content generated, independent from a user editing operation, based on the target media content, the target sharing content comprising a first media content picture generated by applying a predetermined style to a second media picture in the target media content.
