(54) Title: NON-FUNGIBLE TOKEN MANAGEMENT SYSTEMS AND METHODS FOR AN ENTERTAINMENT VENUE

(57) Abstract: A token management system for an entertainment venue includes a processing system with one or more processors and memory storing instructions executable by the processing system. The instructions are executable by the processing system to cause the processing system to identify a digital token possessed by a user, to access one or more permissions stored in association with the digital token, and to determine information about the user. Additionally, the instructions are executable by the processing system to cause the processing system to enable one or more actions for the digital token in response to determining that the information complies with the one or more permissions stored in association with the digital token.
