(54) Title: POSITIONING INFORMATION PROCESSING METHOD AND APPARATUS, AND ELECTRONIC DEVICE AND STORAGE MEDIUM

(54) 发明名称: 定位信息处理方法、装置、电子设备和存储介质

图 2

- S201 In response to a positioning request, respectively acquire distance information of each base station among a plurality of base stations with respect to a terminal device
- S202 On the basis of a plurality of pieces of distance information, determine first location information of the terminal device in a first reference system, which first reference system is determined on the basis of the plurality of base stations
- S203 On the basis of the first location information and location information of a target article, determine positioning information of the terminal device with respect to the target article, wherein the location information of the target article is determined from a computed tomography result

(57) Abstract: Provided in the present disclosure are a positioning information processing method and apparatus, and an electronic device and a storage medium, which can be applied to the technical field of positioning. The method comprises: in response to a positioning request, respectively acquiring distance information of each base station among a plurality of base stations with respect to a terminal device; on the basis of a plurality of pieces of distance information, determining first location information of the terminal device in a first reference system, which first reference system is determined on the basis of the plurality of base stations; and on the basis of the first location information and location information of a target article, determining positioning information of the terminal device with respect to the target article, wherein the location information of the target article is determined from a computed tomography result.

(57) 摘要: 本公开提供了一种定位信息处理方法、装置、电子设备和存储介质, 可以应用于定位技术领域。该方法包括: 响应于定位请求, 分别获取多个基站中的每个基站针对终端设备的距离信息; 基于多个距离信息, 确定终端设备在基于多个基站确定的第一参考系中的第一位置信息; 以及基于第一位置信息和目标物品的位置信息, 确定终端设备针对目标物品的定位信息, 其中, 目标物品的位置信息是从断层扫描结果中确定的。
