(54) Title: COMPRESSION COLLAR EXPANDER ASSEMBLY AND METHOD OF USE

(57) Abstract: Various embodiments of a compression collar expander assembly for expanding a tubular compression collar are described. For example, the compression collar expander assembly can include a guide plate, a spindle plate, and a plurality of carriages movably disposed on a top surface of the guide plate. Each of the plurality of carriages can include a body, a guide projecting from the body, and a die set comprising a plurality of dies. Each die can include a base coupled to a corresponding one of the plurality of carriages and a prong upstanding from the base. In some embodiments, a tapered expander is configured to assist with expanding the plurality of dies.
