(54) Title: PACKAGE FOR CONTAINERS

FIG. 3

(57) Abstract: A carrier for at least partially holding a plurality of containers. The carrier can comprise a plurality of panels including a bottom panel, an outer side panel, a top panel, an inner side panel, a central panel, and an end flap. At least a first container receiver and a second container receiver extend in at least the bottom panel for at least partially receiving containers of the plurality of containers. An inner opening can extend in the inner side panel for at least partially receiving a first flange of a first container at least partially received in the first container receiver, and a free edge of the end flap can be for engaging a second flange of a second container at least partially received in the second container receiver. The central panel can extend at least partially between the first container receiver and the second container receiver.
