

ABSTRACT

REINFORCING BAR BINDING DEVICE

5 A binding mechanism (70) that binds a binding section where a reinforcing bar
extending in a first direction intersects with a reinforcing bar extending in a second direction
that intersects with the first direction, and a main body (11) to which the binding mechanism
(70) is mounted are included, and the main body (11) holds the binding mechanism (70) such
that the binding mechanism is rotatable around a rotation axis that extends in a height direction
10 of the main body (11).
