

Abstract

Method Of Recycling Battery

5 The present application relates to battery recycling technology. In particular, the
present application relates to a method of recycling battery. According to one
embodiment, the method comprises a step of removing an external enclosure of the battery
to expose a housing of the battery; a step of removing terminals of the battery; a step of
removing a top plate of the battery; a step of extracting a cell of the battery from the
10 housing, and a step of disassembling the cell to obtain electrodes, electrolytes and
separators of the battery.
