(54) Title: TARGETING E COLI CELLS

Figure 1

(57) Abstract: The technology described herein relates to methods and compositions for targeting E coli cells, such as for treating or preventing an infection by E coli cells in human or animal subjects. The method, in an embodiment, comprises administering to the subject a particle cocktail comprising a plurality of different transduction particles to E coli cells. The method, in an embodiment, comprises administering to the subject a plurality of transduction particles that encode a nuclease for targeting the genomes of B2 phylogroup E coli cells.
