(54) Title: VIDEO EDITING METHOD AND APPARATUS, AND DEVICE AND MEDIUM

(54) 发明名称: 视频编辑方法、装置、设备及介质

- 101 Acquire a video editing template, wherein the video editing template is generated on the basis of first multimedia data, the first multimedia data comprises at least one multimedia material and editing information, the editing information is used for indicating an editing operation for the at least one multimedia material, the video editing template comprises mark information, and the mark information is used for indicating that a first multimedia material among the at least one multimedia material is marked as a replaceable material
- 102 Display a video editing interface on the basis of the video editing template, wherein a timeline-based video editing track is presented on the video editing interface, a first video track clip is presented on the video editing track, and the first video track clip corresponds to a second video track clip in the first multimedia data, which second video track clip is formed by the first multimedia material
- 103 In response to a material import operation for the first video track clip, replace the first video track clip with a third video track clip, so as to obtain second multimedia data, wherein the third video track clip corresponds to a fourth video track clip, which is formed by a second multimedia material indicated by the material import operation, and the first video track clip and the third video track clip occupy the same timeline position on the video editing track

图 1

(57) Abstract: The embodiments of the present disclosure relate to a video editing method and apparatus, and a device and a medium. The method comprises: acquiring a video editing template, wherein the video editing template is generated on the basis of first multimedia data; displaying a video editing interface on the basis of the video editing template, wherein a timeline-based video editing track is presented on the video editing interface, a first video track clip is presented on the video editing track, and the first video track clip corresponds to a second video track clip in the first multimedia data, which second video track clip is formed by a first multimedia material; and in response to a material import operation for the first video track clip, replacing the first video track clip with a third video track clip, so as to obtain second multimedia data, wherein the first multimedia material in the first multimedia data is replaced with a second multimedia material in the second multimedia data. In this way, in the embodiments of the present disclosure, the video editing efficiency and flexibility are improved.

本国际公布：
— 包括国际检索报告(条约第21条(3))。

(57) 摘要: 本公开实施例涉及一种视频编辑方法、装置、设备及介质，其中该方法包括：获取视频编辑模板；其中，视频编辑模板是基于第一多媒体数据生成的；基于视频编辑模板，显示视频编辑界面；视频编辑界面呈现有基于时间线的视频编辑轨道，视频编辑轨道上呈现有第一视频轨道片段，第一视频轨道片段对应于第一多媒体数据中由第一多媒体素材形成的第二视频轨道片段；响应于针对第一视频轨道片段的素材导入操作，将第一视频轨道片段替换为第三视频轨道片段，以得到第二多媒体数据；其中，第一多媒体数据中的第一多媒体素材被替换成第二多媒体数据中的第二多媒体素材。由此，在本公开的实施例中，提升了视频编辑的效率和灵活性。
