

HETEROCYCLIC COMPOUND, AND PREPARATION METHOD THEREFOR AND USE THEREOF

ABSTRACT

The present application relates to the field of medicine, and particularly relates to a drug linker compound. The drug may comprise a DNA topoisomerase inhibitor. A conjugate prepared from the drug linker compound, such as an antibody drug conjugate, has a better drug antibody coupling ratio, and has a good targeted killing effect on tumors such as lung cancer, melanoma, breast cancer, gastric cancer and colon cancer. In addition, further provided in the present application are a method for preparing the antibody drug-linker molecule, and the use thereof.
