

ABSTRACT

A wheel (100) includes a boss (10), a rim (20), and a web (30). The rim (20) includes a tread (211) and a flange (212). The web (30) includes a curved portion (31). The curved portion (31) is provided continuous with the rim (20). When the wheel (100) is viewed in longitudinal section, the curved portion (31) curves convexly toward an opposite side to the flange (212) in an axial direction of the wheel (100). The apex (313) of the curved portion (31) is located further outward than a center (Cw) of the web (30) in a radial direction of the wheel (100). When the wheel (100) is viewed in longitudinal section, the web (30) has a thickness that changes along a direction in which the web (30) extends. The web (30) has a maximum thickness at the curved portion (31).
