(54) Title: ANIMAL CONTAINMENT UNIT FOR A VEHICLE

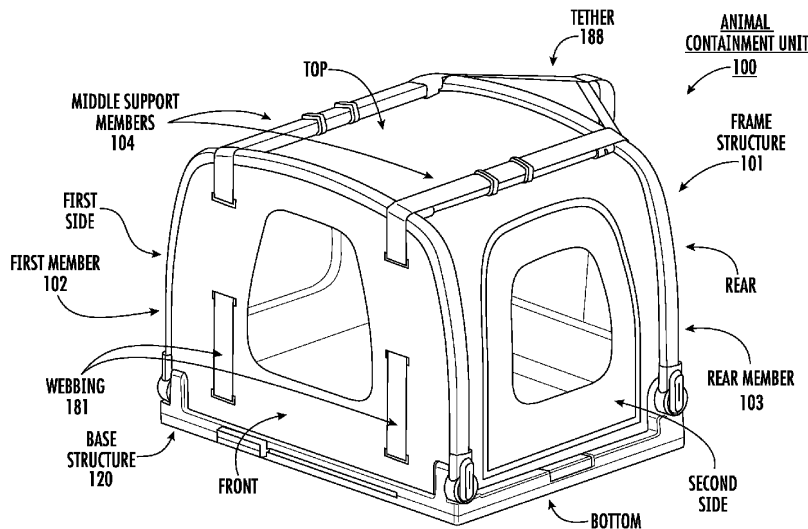

FIG. 1A

(57) Abstract: A unit is for containing animals on a seat of a vehicle includes a base structure includes a base. The unit also includes a frame structure having a front member coupled to a front portion of base, a rear member coupled to a rear portion of the base, and containment materials extending at least partially about the frame structure. A webbing structure includes at least first and second spans of webbing. Each of the spans has a first end coupled to a first anchor point at the base structure and extends about an exterior of the frame structure and wraps around the front member. A second end of each of the spans is configured to couple to a rigid connection on or adjacent to the seat of the vehicle so that the webbing extends about the frame structure along a desired path to restrain a pet contained within the unit.
